

Skincare Routine

Morning, night and body care for your five products from The Ordinary

MORNING • EVERY DAY

	STEP	NOTES
1	Cleanse	Rinse with water or use your usual gentle cleanser (<i>not in your cart</i>).
2	Niacinamide 5% Face & Body Emulsion	A small amount over the face and neck.
3	Natural Moisturizing Factors + HA	Moisturiser. Seals everything in.
4	Sunscreen SPF 30+	<i>Not in your cart, but essential.</i> Both acids make skin more sensitive to the sun.

NIGHT • FACE

	STEP	NOTES
1	Cleanse	Gentle cleanser. Pat the face completely dry before any acid.
2	Acid nights only: Glycolic Acid 7% Exfoliating Toner <i>or</i> Salicylic Acid 2% Solution	Follow the weekly plan below. Never both on the same night. Glycolic: on a cotton pad over the face, avoiding the eyes. Salicylic 2%: a thin layer on blemish-prone areas only. Let it dry for about a minute.
3	Niacinamide 5% Face & Body Emulsion	Every night. On rest nights, start here after cleansing.
4	Natural Moisturizing Factors + HA	Final step.

WEEKLY ACID PLAN • FACE, AT NIGHT

MON	TUE	WED	THU	FRI	SAT	SUN
Glycolic toner	Rest	Salicylic 2%	Rest	Glycolic toner	Rest	Salicylic 2%

Weeks 1–2: one acid night per week only. Week 1: glycolic toner on Monday. Week 2: salicylic 2% on Wednesday. From week 3, follow the full plan above. If your skin stings, peels or turns red, go back to one acid night a week.

BODY · AFTER A SHOWER

	STEP	NOTES
1	Salicylic Acid 0.5% Body Serum	Body only, never the face. On rough or bumpy areas (arms, back, chest, legs). Start every other day and build up if your skin is happy. Not on broken or freshly shaved skin.
2	Niacinamide 5% Face & Body Emulsion	Over the body to moisturise. On days without the serum, use it on its own.

PRODUCTS AT A GLANCE

PRODUCT	WHERE	WHEN
Niacinamide 5% Face & Body Emulsion	Face and body	Morning and night, daily
Natural Moisturizing Factors + HA	Face	Morning and night, daily
Glycolic Acid 7% Exfoliating Toner	Face	Night, Mon and Fri
Salicylic Acid 2% Solution	Blemish-prone areas of the face	Night, Wed and Sun
Salicylic Acid 0.5% Body Serum	Body only	After a shower, every other day to start

GROUND RULES

- **Patch test** every new product on a small area (inner arm) for 24 hours before first use.
- **Never mix acids.** The glycolic toner and salicylic 2% never share a night. The 0.5% body serum stays on the body.
- **Sunscreen every morning.** It is what stops the acids working against you.
- **Keep acids away** from the eyes, lips and broken skin.
- **Pregnant or breastfeeding?** Check the salicylic and glycolic products with a doctor first.
- **Give it time.** Judge results after 6–8 weeks, not 6–8 days.
